Fresh Baby Food

I remember slaving away over the stove, boiling and mashing and freezing, so that my baby could have all the vitamins and goodness that only fresh food can deliver.

Now one mother has heard the collective call of a nation of overworked and too tired parents and created an all natural baby food, that is available in the refrigerated section of the supermarket. WooHoo! Babyboost is the only fresh prepared baby food available Australian wide, that is not frozen or tinned.

The meals are based on home made recipes and blended to a consistency suitable for babies (from 6 months), with absolutely no compromise on nutrition.

This Australian first in baby food (Babyboost), is available now in Coles supermarkets nation wide. www.babyboost.com.au

Happy Little Bottoms

The newly launched Nature Boy and Girl range of nappies are like no other nappy on the market, in that they are 70% biodegradable and use far fewer chemicals than regular nappies.

Inventor, (Swedish born) Marlene Sandberg says that like many parents around the world, she worried about the environmental impact of using disposable nappies and wipes when her children were born. She was horrified to discover, that the average Swedish baby uses about half a ton of nappies each year. She thought that was too much uncompostable landfill to have on her conscience, so she set about to make a difference. Hence, Nature Boy and Girl nappies were born.

The secret to their previous success (in other countries) is their clever, ultra thin construction. Nature Boy and Girl nappies keep infants as comfy and dry as other brands, thanks to a non-bulky design that uses specially designed ducts to draw urine away from the skin quickly. They are fragrance and chlorine free, covered with a breathable film made from 100% GM-free maize and natural tree pulp and use only water based inks, so they're better for the environment in a whole range of ways.

Competitively priced, Nature Boy and Girl nappies are available in Coles supermarkets and for further information, you may log on to www.naty.com or phone 03 9541 1400.

Rid Lice Naturally

Now that the kids are back at school, we have that age old problem to deal with - nits. Well the good people at Ego pharmaceuticals have come to the rescue with their MOOV Head Lice treatment products.

MOOV's innovative natural formula has been clinically proven to be as good, if not better than chemical formulas.

Their blend of low-irritant, natural essential oils are better suited to children with sensitive skin. MOOV is also 100% Australian owned and produced and the key ingredient (Eucalyptus oil) is of course, uniquely Australian.

Available in pharmacies nation wide, from only \$12.99.

Marlene with her children

WIN WIN WIN

Three lucky children will each win a Leapfrog Leapster, Leapster Carry Case and three Leapster games/cartridges.

The award winning Leapster combines animated handheld game technology with learning – teaching about letters, phonics, rhyming, spelling, numbers, counting, addition, subtraction, art and music. The Leapster is a magical combination of the latest interactive handheld 'game console' technology and the Leapster Learning Library (and it puts it all right into your child's palm).

If you would like to win one of these fantastic prizes, e-mail us your name, address and phone number to [COMPETITIONS](#) and make sure that you put **Leapster** in the subject line.

Competition open to residents of Queensland, Australia only.
